Projects

CS Drop
web application
A modern MERN stack application built as a Online Shopping platform. This project features a responsive interface, product catalog, order management, and real-time data interaction to streamline sales and customer engagement.

Finora
Android App
Finora is an Android app developed with Kotlin, utilizing Shared Preferences for user login and data storage. It helps users track their budget, add income and outgoing transactions, and receive timely notifications.

SPARK
Web application(team)
A mordern MERN stack web application designed as a volunteer, volunteer organization, and volunteer event management system. This project features user authentication, role-based access control, and a responsive design to ensure accessibility across devices. This project devolped as a part of the 3rd year group project for the degree of BSc in Software Engineering at the University of SLIIT
